TENTANG SAYA

I am an Information Technology professional with extensive experience in network infrastructure integration, IT systems management, and data security. Starting my career as a Network & IT Support Specialist, I developed a strong foundation in system stability, digital infrastructure management, and hardware/software optimization across various organizations. This experience has shaped my mindset to consistently develop secure, reliable, and scalable solutions. Currently, I am expanding my expertise into Intelligent Transportation Systems (ITS) and Computer Vision, with a keen interest in developing systems capable of processing real-time data and transforming raw data into valuable insights to support faster, more accurate, and efficient decision-making processes

EDUCATION

Universitas Gadjah Mada | S2 - Magister Ilmu Komputer
(Agustus 2025 – Saat Ini)

Universitas Gunadarma | S1 - Informatika | IPK 3.33
(2018 – 2022)

WORK EXPERIENCE
